

**Name: Huma Nisar**

**Roll Number: TN/IN01/PY/012**

### **Task Objective:**

To write basic python script to output personal information, and perform simple arithmetic operations. This assignment also focuses on documenting the process and using GitHub for submission.

### **Codes Explanation:**

#### **CODE 1:**

```
print("Huma Nisar")
print("gaming")
print("20")
print("I want to learn skills in python")
```

In this code, I print my name, my hobby, my age, the reason behind why I want to learn python. In this, I just use print () command to show this info on the screen.

#### **OUTPUT:**

```
Huma Nisar
gaming
20
I want to learn skills in python
PS D:\Course Studies AI\Third semester\python internship tasks>
```

#### **CODE 2:**

```
print(23+48)
```

In this code, I simple print the addition of two number by using math operation (+) and print () command to show output on the screen.

#### **OUTPUT:**

```
71
PS D:\Course Studies AI\Third semester> █
```
